## 705 Template Checklist

### 1. Reasons for Allowance:

- ☐ *Clear statement of Reasons for Allowance.*
  - No undue interpretations or unnecessary portions of the spec read into claims.
  - No reliance on unclaimed features.
  - Does not repeat or paraphrase the entire claim and avoids adding phrases such as "along with the other features of claim 1" that imply the rest of the claim.
- ☐ *Indicate how claims distinguish over the closest prior art.*
  - Specifically identify at least one piece of prior art.
  - Prior art identified should make sense in light of prosecution history.
- ☐ *Claim groups of differing scope have separate RFA.*
  - Includes recognition of dependent claims that switch statutory class and independent claims that recite subcombinations of a combination.

### 2. Search Areas and Tools:

- ☒ *US Classified Search*
  - Search matches issue classification.
  - Pertinent areas searched including analogous art
- ☒ *US Patents Text Search - EAST, WEST or STN 10:20*
- ☐ *Foreign Patent Documents - WEST, Derwent WPI or Epoque II*
- ☐ *NPL Search - Dialog*
  - Core databases used according to OR classification of case.
  - PGPubs search for cases filed 11/29/00 or later, or those filed prior and voluntarily published

### 3. Search Query:

- ☐ *Text Search - Strategy to search concepts/key words*
  - Not unduly limited to class or subclass and covers analogous arts.
  - Appropriate use of synonyms and proximity operators.
  - No spelling errors.
  - Searches not solely focused on claim language or finding a 102.

- ☐ *Separate strategies of each search area (US, foreign, NPL).*  
As appropriate, e.g. include common colloquial, informal or commercial terms for a feature, if known, when searching NPL versus searching patents.

- ☐ *Recordation of search in file wrapper.*  
Each query history printout identifies: date, tool, databases, strategy, how viewed.  
Examples of "how viewed" include: "scanned titles", "kwic", "read abstracts", "front page", "considered".  
Strategy print out is not truncated.

#### 4. Reference Citations:

- ☐ *Best art in each category (US, Foreign, NPL) listed on 892 and/or 1449.*  
Foreign art should not just be a foreign equivalent of a US patent.
- ☐ *Clear indication of why each reference was cited.*  
Art cited at allowance to comply with template must be discussed.  
No overly generic statements (e.g. "cited to show the state of the art").

@ Conclusion:  
 Why best      1) Foreign —  
                          2) NPL —
